Sudbury Therapeutic Riding Program (STRP) may need to access other sources in order to provide the rider a safe and healthy therapy session. This lesson may include games and exercises that we use to stimulate the rider's physical and emotional well being. Although our instructors are properly trained, they often need to refer to the advice of therapists concerning the rider's disability. Fortunately, we are able to access the Children's Treatment Centre (CTC) for knowledge and resources.

We now ask you to provide us with the rider's therapist(s) if this is available. Any information shared will only be used by STRP and will not be shared with any other party(ies).
